

IT Solutions LLC is known for information technology expertise coupled with knowledge of medical and technological advances and healthcare governmental and regulatory requirements.

We listen to our clients' needs and implement the best technology to meet those needs— and we even make house calls.

About IT Surgeons

IT Solutions LLC is an information technology services and solutions company. We provide application support from installation and integration, to consultation and maintenance, allowing our clients to get the most out of their business resources.

IT Solutions provides preventive care, standard care, and emergency care to computer systems and networks. From consulting with your staff on best practices for medical offices, to detailed system and security assessment and management, IT Solutions is the trusted source in the Northern California medical community.

Place your computer systems in the care of a professional. Contact IT Surgeons today.

Services

Our service offerings include:

Consulting

As experts in information technology services and best computing practices for medical offices, IT Surgeons first evaluates your needs and existing setup, and then prescribes the best treatment possible—allowing you to maintain a healthy and secure IT environment.

Development

We solve business and computing problems, resulting in long-term savings to our clients.

IT Surgeons' development services include:

- " Business application installation and configuration
- " Systems integration
- " Advanced network services
- " Network and patient security (wireless, Internet, HIPAA)
- " Business continuity and disaster recovery
- " LAN and VPN services

Support

IT Surgeons supports single and multiple office locations, as well as integrated Mac/PC networks. Our preventive, standard, and emergency care gives your business the right support at the right time, in an easy to reach manner—by phone or Internet.

Project Management

Our technicians keep the focus where it should be—on your business. IT Surgeons strives to improve IT operations, while reducing our clients' costs and business disruptions. And we do this by effectively managing each project and providing prompt, courteous service.

Clients

Our goal is to provide each client with the best care possible to ensure that their systems remain healthy.

We've helped the following businesses:

AIS Services

Allergy and Asthma Group

Bay Area Retina Associates
